Teen Pregnancy Prevention Month

Planned Parenthood's signature education and pregnancy prevention programs provide Texans with skills and support to make well-informed decisions about their sexual health. We offer workshops to help parents talk to their teens and pre-teens, facilitated by professional health educators. Our programs are medically accurate, age-appropriate, and help keep teens safe and healthy.

All of Planned Parenthood's community health education programs are donor- and grant-funded so that we can provide them **at no cost** as a community resource. To learn more about scheduling or participating, contact a Planned Parenthood health educator. Call **512.485.0130** or email **healtheducationaustin@ppgt.org** today!
