

PLANNED PARENTHOOD IS:

The fearless voice of progress for the rights of women and women's sexual health care. From birth control to cancer screenings to sex education, Planned Parenthood stands for the health of all people, no matter what.

PREVENTION

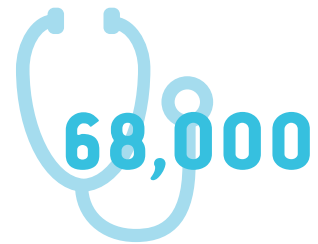

Prevention is our passion. **In fact, Planned Parenthood helps prevent more than 20,000 unintended pregnancies every year in Minnesota.** 95% of what we do is preventive care like life-saving cancer screenings, birth control, STD testing and treatment and annual exams.

ALL WALKS OF LIFE

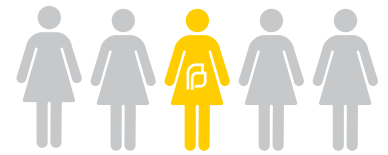

Planned Parenthood patients come from all walks of life. **Every year, PPMNS serves 68,000 patients, including 6,000 men.**

Our typical patient is a young woman between 20 and 30 years old, seeking family planning services. **She may have insurance or she may not, but either way, we're here for her.**

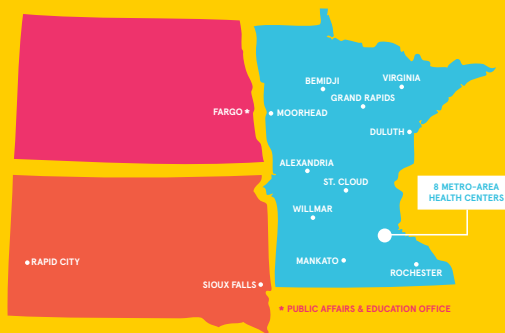

1 IN 5 WOMEN

1 in 5 women has come to Planned Parenthood for expert, confidential, nonjudgmental care. That's more than **30 million women nationwide!**

EDUCATION AND COMMUNICATION

We believe everyone has the right to good information about their health and their sexuality – no apologies. **Our sex ed programs reach more than 34,000 people a year,** sparking healthy communication among young people and families.

Making our place in the new health care world.

From our 20 clinics to our Online Health Center, Planned Parenthood is here for everyone – whether they have insurance or not, no matter where they live and regardless of their ability to pay. As our nation faces great change in health care, Planned Parenthood remains dedicated to eliminating health disparities and providing culturally competent care throughout the state, as we have since 1928.

Planned Parenthood protects, promotes, and provides comprehensive and progressive sexual and reproductive health care for generations of young women, no matter what.
