

Mission

The mission of Planned Parenthood of Hawaii (PPHI) is to be the leading provider of reproductive health services, education, and advocacy for the people of Hawaii.

Health Services

Planned Parenthood of Hawaii works to prevent unintended pregnancy and is committed to making every child a planned and wanted child. We believe that decisions about childbearing should be made by women in good conscience with their families and doctors. PPHI provides accurate sexual and reproductive health information and access to affordable services to help sexually active adults and youth be safe from unplanned pregnancies, from sexually transmitted infections (STIs), and from sexual coercion. Nearly 70% of all Planned Parenthood of Hawaii patients are low-to-moderate-income individuals and are eligible to receive family planning services at low to no cost, subsidized by the federal Title X program and contributions from our donors.

We routinely provide family planning services to underinsured and noninsured persons, persons with low income, immigrants, males, adolescents, at-risk youth, and persons with Limited English Proficiency. We provide professional interpreter services free of charge for patients who need them. We have hydraulic exam tables that accommodate individuals with physical disabilities.

During FY 2011, Planned Parenthood of Hawaii (PPHI) served more than 8,750 individual patients in more than 12,750 separate visits to our three clinics located in Honolulu; Kahului, Maui; and Kailua Kona, on Hawaii Island. PPHI has also expanded services to serve Kauai Island, beginning with one day a week on Fridays, as of February 17, 2012.

Our clinical program offers patients a full range of reproductive and sexual health care and contraceptive services, including:

- Annual pelvic examinations, Pap smear screening for cervical cancer, clinical breast exams, and advanced screening and treatment for cervical abnormalities;
- Pregnancy testing and options counseling;
- Testing and treatment for STIs, including Rapid HIV testing;
- Affordable birth control services and supplies (all FDA-approved methods, including the pill, the shot, the patch, the ring, and long-term reversible contraception, such as IUDs [intrauterine devices] and the implant), and emergency contraception (EC);
- In-clinic and abortion pill services and support;
- Reproductive health care, education, counseling, and birth control services (as requested) for adolescents age 14 and older. Adolescent counseling includes resisting sexual coercion, encouragement to involve parents, STI prevention, and contraceptive options;
- Services for women approaching and experiencing menopause;
- Vaccination against human papilloma virus (HPV) to help prevent cervical cancer;
- Hormone therapy for Transgender patients (male to female).

PPHI accepts most employer-sponsored and public health care insurance plans. We accommodate uninsured patients in need of family planning services by offering a sliding fee scale based on income

PPHI offers both medication (the abortion pill) and in-clinic (surgical) abortion services and support. The abortion pill is offered up to 9 weeks LMP (last menstrual period). Surgical abortion services are offered up to 18 weeks. Because PPHI provides abortion services outside of a hospital setting, we can offer these services at a substantially lower cost. This is particularly true for patients who are at 14 to 18 weeks and need intravenous sedation.

Planned Parenthood of Hawaii operates four clinics in the State of Hawaii.

HONOLULU CLINIC

1350 S. King Street, Suite 310
Honolulu, HI 96814
808-589-1149

M 8:30 – 5:30

D. White	33%
E. Other	26%

Educational Programs

The PPHI Education & Training department provides medically accurate reproductive and sexual health education and training that includes evidence-based programs, in public and private school settings, universities, and community groups/organizations. In FY 2011, PPHI educators presented over 775 separate educational sessions and made 20,343 direct educational and outreach contacts reaching more than 7,392 individual students, parents, teachers, youth-serving professionals, and other interested individuals across the State of Hawaii and in the Pacific Basin. The PPHI Education team implemented lessons in 45 schools, 10 community-based agencies, and 2 faith-based agencies on Oahu, Maui, Lanai, Kauai, and Hawaii Island.

PPHI Education & Training staff also facilitated sex ed workshops statewide, in the Commonwealth of the Northern Marianas Islands, and the continental U.S. Staff provide technical assistance to various organizations and teachers statewide. PPHI is incredibly proud to be working on both of the Office of Adolescent Health (OAH) contracts in Hawaii.

Through Hawaii Youth Services Network (OAH Tier 1), staff implement and provide training and technical assistance on the multi-week Making Proud Choices (MPC) curriculum. The MPC curriculum has been identified by the Centers for Disease Control as “a program that works” to teach early teens healthy and responsible sexuality behaviors, including condom use.

Working in coordination with the University of Hawaii Centers on Disability Studies (OAH Tier 2), staff developed and piloted the new Pono Choices program geared for middle school youth. Pono Choices is a culturally responsive teen pregnancy and STI prevention program.

Advocacy

The 2012 legislative session has come to a close. Throughout session, PPHI worked hard to pursue measures that protected women’s health. We are happy to report that again this session, the Hawaii State Legislature did not consider any measures that would have limited access to sexual and reproductive health care.

We are disappointed that our top priority bill, The Compassionate Care Act, did not pass. But, we are grateful and heartened by the incredible support our community gave. Over the course of the session, over 1,500 of YOU submitted supporting testimony, came to hearings, called and emailed your representatives, and signed our petition. What a tremendous response! With your continued support, we’re optimistic that we can pass Compassionate Care in 2013!

Sources of Revenue and Use of Funding

Planned Parenthood of Hawaii relies on the support of individual donations, grants, and the revenue generated by fee-paying patients to provide free or low-cost services to individuals unable to afford reproductive health care. PPHI educational programs are funded primarily from donated revenue. During fiscal year 2011, Planned Parenthood of Hawaii’s revenue was \$3,685,175.

Source of Revenue

Patient Revenue	\$2,248,787	61%
State / Federal Funds	\$890,458	24%
Fundraising Revenue	\$526,977	14%
Other Revenue	\$19,252	1%

Use of Funding

Patient Care Services	\$2,332,394	68%
Management	\$466,977	14%
Education	\$355,216	9%
Fundraising	\$200,182	6%
Public Affairs	\$112,813	3%
