

Transgender Services

Hormone Provision & Preventative Health

Planned Parenthood Columbia Willamette (PPCW) provides quality, compassionate healthcare using an informed consent model.

We serve transgender people and people at various places on the spectrum of gender identity and expression. We are committed to improving the way transgender people receive health care. We proudly partner with our transgender community in eliminating barriers to care.

What services do we offer?

We offer transgender hormone provision as well as preventative sexual health care services that include: cancer screening, wellness education, STD testing and treatment, HIV testing, annual exams, pregnancy testing, vasectomies, birth control, emergency contraception, abortion care and more.

Our NE Portland location will inventory and dispense a variety of feminizing and masculinizing medications as well as provide in-clinic testosterone injections.

Written prescriptions will also be provided for those clients who prefer to fill their prescriptions at their pharmacy of choice.

How do I make an appointment?

To become a new patient, please call 1-888-576-PLAN (7526) and our knowledgeable Call Center staff will help answer your questions and schedule an appointment.

I'm already on hormones; can I transfer my records to PPCW and become a patient?

Yes. If you are already being seen by a medical provider for hormones but wish to transfer your care to PPCW, you can do that. You can make an appointment at 888-576-PLAN (7526).

How much does it cost?

When you call to make an appointment, our staff will help you figure out costs and payment options. We do bill insurance, and if you do not have insurance we can help you sign up for an insurance plan that will cover your care.

If you prefer not to use your insurance, talk to us about other payment options.
