EXPANDING OUR REACH

EDUCATION PROGRAM
ENGAGING FAMILIES AND COMMUNITIES TO FOSTER LIFELONG HEALTHY RELATIONSHIPS AND ATTITUDES

Through programs like Teen Council, Parent-Child Communication, and SiHLE (Sisters Inform Through programs Like, a proven, evidence-based youth development program aimed at reducing teen pregnancy, top in partnership with community members to educate teens in a safe, supportive environment.

We work with community members to educate teens, parents, and community members about healthy relationships by participating in Sex and Health Information Through interactive curriculum and group discussions and to reach more than 10,000 youth and adults.

EDUCATION TO OUR SUPPORTERS;

In September, 2010, the Oregon Health Authority announced a competitive program to support the development of reproductive health education initiatives in Oregon. Planned Parenthood will be a recipient of this funding to support the Healthy Generation Initiative, a program that will be implemented across the state.

The program will focus on providing comprehensive reproductive health education to all children and adolescents in Oregon, with a particular emphasis on those populations that are most vulnerable to unintended pregnancy and sexual health disparities.

This initiative will provide a unique opportunity to advance Oregon's Youth Development Plan and to reach all children and adolescents with the comprehensive reproductive health education they need to make healthy, informed decisions about their own health.

The initiative will be implemented in collaboration with schools, community organizations, and other partners to ensure a coordinated approach to reproductive health education across the state.

We believe that all children and adolescents should have access to comprehensive reproductive health education, regardless of their ability to pay. The Healthy Generation Initiative will help us to ensure that all children and adolescents have the information and skills they need to make informed decisions about their own health and well-being.

We are grateful to the Oregon Health Authority for this important investment in our state's future and to all of our partners who will be working together to make this program a success.

Thank you for your continued support of Planned Parenthood.

2010-2011 ANNUAL REPORT

I have many friends that would have nowhere else to go to get birth control if it wasn’t for Planned Parenthood.
This year, PPCCW began offering Adiana®, an affordable permanent birth control option for women. The procedure is an outpatient, in-office procedure that takes less than 30 minutes and involves the placement of a small, flexible tube in each fallopian tube. This will allow sperm to pass, but prevent fertilized eggs from entering the uterus. It is a 99% effective form of birth control and can last a woman her whole life. Studies have shown that the risk of complications is low, and the procedure is well tolerated by most women.

New at Planned Parenthood: Adiana

After five years of dreaming, fundraising, construction, and community planning, the Elizabeth Flanagan Regional Service Center is complete. It is the largest project ever undertaken by Planned Parenthood in the West Coast, and the Very Best in Planned Parenthood.

Your donations help people make informed decisions and become more resourceful about their reproductive health.

EDUCATION PROGRAM

ENGAGING FAMILIES AND COMMUNITIES TO FOSTER LIFELONG HEALTHY SEXUAL ATTITUDES AND VITALITY

Through programs like Teen Council, Parent-Child Communication, and S.E.L.L. (Sisters Inform, Engage, Lead, Learn: Helping Lead Young People), our education and outreach initiatives work with youth and parents, encouraging communication and fostering healthy relationships. Our programs teach developmentally-appropriate, evidence-based, comprehensive sexual and reproductive health information.

Preventing Teen Pregnancy

In September 2010, multicounty award-winning Preventing Teen Pregnancy (PTP) expanded its programs and served the largest number of patients ever in a single calendar year. PTP is a comprehensive, year-round program operated by Planned Parenthood affiliates across the state of Oregon. The Oregon Health Authority has awarded $3.3 million for a 3-year expansion (2011-2013) to PTP. The campaign will be called Preventing Teen Pregnancy (PTP) Willamette and the goal is to reach 10,000 young people in 16 service areas. The top (6) counties served will be: Marion, Multnomah, Clackamas, Washington, Yamhill, and Columbia.

In addition to reducing teen pregnancy, the top also reduces failure rates, and school suspensions. The top is proven to increase condom use and reduce the risk of sexually transmitted infections (STIs) and HIV.

By being a Preventing Teen Pregnancy supporter, you can help PTP reach even more youth with top in partnership with schools and community organizations. PTP programs are based on proven, evidence-based, comprehensive sexual and reproductive health education via classrooms and communities to foster lifelong healthy sexual attitudes and vitality.

I have many friends that would have nowhere else to go to get birth control if it wasn’t for Planned Parenthood.
After five years of dreaming and planning, Planned Parenthood of the Oregon and SW Washington Region is poised to serve more patients than ever before, and will proudly continue to provide comprehensive reproductive health care for all, regardless of income. Our new Regional Service Center is much more than a building; it’s a symbol of our commitment to Planned Parenthood’s core mission of ensuring that sexual and reproductive health care in Oregon and SW Washington have access to a full range of affordable services, no matter who they are or where they live. At our organization, the Let’s Work Hard For Oregon and SW Washington campaign (HCR) is working to ensure that reproductive health care remains a top priority in national health care reform.

**New at Planned Parenthood: Adiana**

This year, PPWCW began offering Adiana® an affordable, safe, and effective long-acting reversible contraceptive. Adiana® provides continuous protection against pregnancy for up to seven years, and enhances the experience of sex for women, and their partners. Women and men interested in learning more about the very safe and highly effective contraceptive method can contact their PPWCW provider. This soft, flexible rod, inserted in and around the tiny fallopian tubes, stops fertilized eggs from entering the uterus.

**Planned Parenthood Advocates of Oregon**

PPWO took an exciting step forward with Planned Parenthood of Southwestern Oregon (PPCWO) in January 2011, when supporters of the Oregon Health Care Reform (HCR) and Planned Parenthood Advocates of Oregon (PPAO) came together to form a new, statewide organization. This new entity is able to combine our power, expertise, and resources to make a bigger impact in the political arena.

**Planned Parenthood Advocates of Oregon's role in HCR**

PPAO is working hard to ensure that Oregon’s health care reform (HCR) includes a strong reproductive health care component. As the state faces the difficult task of designing a health care delivery system that works for all Oregonians, PPCWO and PPAO will be working together to ensure that a variety of reproductive health care options are available to all Oregonians.

EXPANDING OUR REACH

54PPCW youth ambassadors reached out to the families of their peers with sexual and reproductive health education on campus and in the community.

Education and volunteers provided sexual and reproductive health education to 10,800 youth and adults.

91An African American young man learned to give an effective and respectful approach to getting economic aid.

108Peaceful interaction is one of the goals of our EAmT program.

34Spanish-speaking parents joined our school and community outreach to provide services to their kids.

9Adults learned about the benefits of taking with their children about sexual and healthy relationships.

EDUCATION PROGRAM ENGAGING FAMILIES AND COMMUNITIES TO FOSTER LIFELONG HEALTHY SEXUAL ATTITUDES IN YOUTH

Through programs like Teen Council, Parent-Child Communication, and EAmT (Emphasizing Healthy Living Experience), our education and outreach collaborations with youth, parents, educators and community members, encouraging communication and fostering healthy relationships. Our programs have developed, improved upon, and expanded educational programs. Our programs have reached more than 50,000 youth and adults.

In September 2010, a $3.3 million grant was awarded to six Planned Parenthood organizations, including Portland. To advance Oregon’s Youth Empowerment Program that focuses on reducing teen pregnancy rates. From the grant award, PPNW will implement the Oregon Youth Empowerment Program in the Oregon Counties with the highest teen birth rates. The program will be tested in Multnomah, Clackamas, and Washington Counties. The program will include community-based education, parent-teen dialogues, peer-to-peer influence, and youth leadership training. The program will be implemented in partnership with community organizations, and the program will evaluate its impact on reducing teen birth rates.

PPNW will implement the Oregon Youth Empowerment Program in Multnomah, Clackamas, and Washington Counties to reduce teen pregnancy rates. The program will include community-based education, parent-teen dialogues, peer-to-peer influence, and youth leadership training. The program will be implemented in partnership with community organizations, and the program will evaluate its impact on reducing teen birth rates.

In addition to reducing teen pregnancy, the program will also support the professional development of educators and volunteers who will offer top-in-service training and support. The program will reach more than 10,000 youth over five years. PPNW’s award is part of a larger $20 million grant awarded to six Planned Parenthood organizations, reaching more than 200 youth and adults in 2010. Planned Parenthood will implement the Oregon Youth Empowerment Program in Oregon Counties with the highest teen pregnancy rates. The program will be tested in Multnomah, Clackamas, and Washington Counties. The program will include community-based education, parent-teen dialogues, peer-to-peer influence, and youth leadership training. The program will be implemented in partnership with community organizations, and the program will evaluate its impact on reducing teen birth rates.

Preventing Teen Pregnancy

In the past year, we have expanded our leadership team (Children’s Health) and have significantly improved our performance. We have engaged our partners and served the largest number of patients every year. In 2010, we served 32,000 youth and 2,000 adults, up from 20,000 in 2009. We have increased our services, including reproductive health education to 10,800 youth and adults. We have expanded our services to include Kennewick and the Tri-Cities.

Currently, our team is working to design and implement a new program aimed at reducing teen pregnancy rates. Our program is based on evidence-based youth development and comprehensive sexual and reproductive health education. Our program will be implemented in partnership with community organizations and the program will evaluate its impact on reducing teen birth rates. Our program is based on evidence-based youth development and comprehensive sexual and reproductive health education. Our program will be implemented in partnership with community organizations and the program will evaluate its impact on reducing teen birth rates. Our program will be implemented in partnership with community organizations and the program will evaluate its impact on reducing teen birth rates. Our program is based on evidence-based youth development and comprehensive sexual and reproductive health education. Our program will be implemented in partnership with community organizations and the program will evaluate its impact on reducing teen birth rates.

We have taken a leadership role in reducing teen pregnancy rates. Our program is based on evidence-based youth development and comprehensive sexual and reproductive health education. Our program will be implemented in partnership with community organizations and the program will evaluate its impact on reducing teen birth rates. Our program is based on evidence-based youth development and comprehensive sexual and reproductive health education. Our program will be implemented in partnership with community organizations and the program will evaluate its impact on reducing teen birth rates.
This year, PPCW began offering Adiana® an affordable permanent birth control option for women. Adiana® is a one-time procedure in which a small, flexible rod is implanted under the skin of the upper arm, and a hormone is released over time to prevent ovulation. This procedure is 98.4% effective in preventing pregnancy for up to 5 years. It is a safe, simple, minimally-invasive option for women.

The Planned Parenthood Advocates of Oregon (PPAO) is a statewide organization working to ensure that reproductive health care is available to all Oregonians. PPAO’s mission is to protect reproductive rights and ensure that people have the ability to make informed decisions about their reproductive health and families. This year, PPAO has been working hard to ensure that Oregon’s health care reform (HCR) campaign leads to ensure that reproductive health care remains a top priority in national health care reform. In our work, we have focused on several key issues:

- **Educate and Outreach**: Planned Parenthood has been working hard to educate the public about the importance of reproductive health care and the impact of HCR on this issue. We have been conducting outreach and advocacy campaigns to raise awareness about reproductive health care issues and the need for sustained funding for these services.

- **Government Grants & Contracts**: We have continued to pursue government grants and contracts to support our programs and services. This includes grants from federal and state agencies and contracts with local organizations.

- **Total Support from Community**: We have received a significant amount of support from the community, with contributions from individuals, organizations, and businesses.

- **Net Assets**: We have maintained strong financial health, with net assets of $17,644,447. This includes capital lease obligations of $8,405,620, related expenses of $639,052, and other liabilities of $11,260,641.

- **Summary Financial Information**: Our financial statements reflect a healthy organization that is committed to providing access to reproductive health care and public policy advocacy.
After five years of dreaming and hard work, the Elizabeth Flanagan Regional Service Center was completed in January 2011 - an inspiring example of how a community can come together to provide much-needed services. To honor Elizabeth Flanagan, who helped launch Planned Parenthood in Oregon, the new center is named in recognition of Elizabeth Flanagan. The Elizabeth Flanagan Regional Service Center is a facility that combines two existing sites that serve over 20,000 patients each year. The new center is designed to provide a more efficient and safer delivery of health care services. The center features a family planning clinic, a medical practice, a dental clinic, and a variety of other health services. The center is also equipped with a large open space for community events, making it a versatile resource for the community.

Our volunteers help our health centers run smoothly, provide invaluable support to our administrative staff, and meet community needs, and our program fees cover only about 40% of our costs. Because of the generosity of our donors, we are able to serve a quarter of a million dollars each year.

This year, 362 volunteers donated 13,615 hours to PPCW!

Planned Parenthood Advocates of Oregon

PPCW took an exciting step forward with Planned Parenthood Advocates of Oregon (PPAO) by combining public affairs work under our umbrella organization - Planned Parenthood Advocates of Oregon, to work on a national front, ensuring our power and impact.

The Elizabeth Flanagan Regional Service Center is a wonderful example of how a community can come together to provide much-needed services. The center is designed to provide a more efficient and safer delivery of health care services. The center features a family planning clinic, a medical practice, a dental clinic, and a variety of other health services. The center is also equipped with a large open space for community events, making it a versatile resource for the community.
EXPANDING OUR REACH

54. PP/CPH youth participants provided care to 1,094 of their peers with sexual and reproductive health education, on-campus and at community venues.

Educators and volunteers provided sexual and reproductive health education to 16,860 youth and adults.

91. African American young women learned about mental health at our safe haven in our parent-Child Communication program. Through programs like Teen Council, Parent-Child Communication, and SIBLK (Sisters Inform Through Living Empowering), our educators work with community members to educate teens on how to prevent teen pregnancy. In addition to reducing teen pregnancy, the Preventing Teen Pregnancy program aimed at reducing teen pregnancy failure rates, and school drop-out rates, course pregnancy, top also reduces school drop-out rates.

In September 2010, our team partnered with the Oregon Department of Education to implement the Preventing Teen Pregnancy program at 26 Oregon high schools. The program is designed to help students learn about reproductive health education, and is based on a proven, evidence-based curriculum.

In 2010, PPP/CPC received a $3.3 million grant from the Oregon Department of Education to implement five-year teen pregnancy prevention program, Preventing Teen Pregnancy. The grant will be used to support comprehensive sexual and reproductive health education for 16,860 youth and adults.

PP/CPH has partnered with the Oregon Department of Education to support the Preventing Teen Pregnancy program in 26 Oregon high schools. The program is designed to help students learn about reproductive health education, and is based on a proven, evidence-based curriculum.
