

Birth Control Kit

An Educational Resource for Teachers and Health Professionals

- Provides a visual and hands-on model for educating about birth control methods for use with any audience.
- Developed by experienced Planned Parenthood educators.
- Samples and/or photographs and fact sheets for the most popular contraceptive methods including condoms (Male / Female), a condom demonstrator model, oral contraceptive pills, spermicide (foam with applicator, film, gel), Ortho Evra Patch, Nuva Ring, and a speculum and lubricant. Other current methods may be added as applicable. Information provided describing each method and its range of effectiveness.
No prescription medications are included in this kit.
- Information and demonstration model for IUD/IUS.
- Information about cervical caps, Depo-Provera injection, abstinence, tubal ligation and vasectomy.
- Anatomy charts.
