Our new Highland Park Health Center is now open!
DEAR FRIENDS,

2020 was one for the history books. The pandemic, the wild fires, the election—they each felt like impossible obstacles to overcome. The hits kept coming, but so did our brave patients. They needed us more than ever. So we did more.

Despite the challenges of this year, our doors stayed open because you had our backs. And the heroes in our health centers donned PPE to do what they do best: provide essential health care.

Some of our patients lost their jobs, their health insurance, or their reliable means of transportation. So we swiftly launched telehealth, allowing patients to receive the care they need from the comfort and safety of their own homes. And we’ve since provided care at more than 10,000 telehealth visits!

Thanks to you, we are caring for those hardest hit in our country and in our local community. This year we opened two new health centers, while continuing to expand the depth and breadth of our services.

We hope you will enjoy reading more about all that we accomplished this year, thanks to you. And we thank you for standing with us as we look ahead to building brighter futures for our patients.
