

Our Impact in Louisiana.

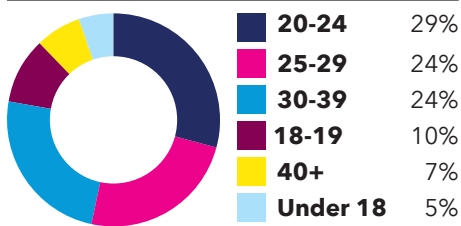

In Louisiana, your support helped us launch the **Chat/Text program**, which enables people of all ages to contact PPGC health educators through text or instant messaging to ask questions about birth control, emergency contraception, STD testing, pregnancy testing, and abortion. We continued to expand services in Louisiana, including **telehealth and curbside Depo birth control shots**, plus **vasectomy services** and **daily colposcopy** in the New Orleans health center, and **advanced gynecological visits, LEEP, and ultrasound services** for gestational aging and IUD localization in the Baton Rouge health center. Also last year, we saw a **127 percent increase in active volunteers** in New Orleans and a **50 percent increase in active volunteers** in Baton Rouge.

"I really appreciate the effort they've made to continue services curbside during the pandemic."
BATON ROUGE PATIENT

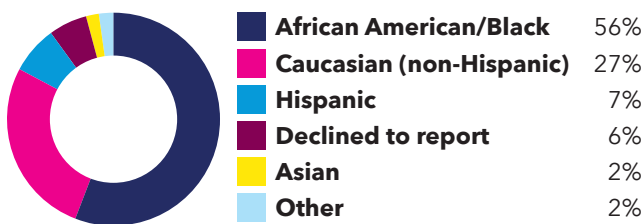

"This was the most positive experience I have ever had with a health care appointment. I felt so taken care of and as though my provider truly cared about me. Every part of the process, from check-in to check-out, was full of kindness."
NEW ORLEANS PATIENT

"Empowering patients with voter registration is the least we can do to amplify their voices in both Planned Parenthood and our larger New Orleans communities."
