

"I recently reduced my hours at work. (I am a full-time student and work at internship.) Consequently, I lost my health insurance. I was unable to qualify for the special enrollment period using the marketplace, so I was left uninsured for a period of time. I have been identified as being at high-risk for cervical cancer, and have been able to continue with check-ups and screenings at Planned Parenthood at a reasonable cost. I am so grateful that Planned Parenthood exists to fill gaps in our healthcare system for low-income women. I have donated money in the past and will do so in the future when I am better positioned. I have always been treated with respect and dignity at Planned Parenthood."

— Annie, a PPGT patient in Austin

Cervical Health Awareness Month

5,409

In 2018, we conducted 5,409 potentially life-saving cervical cancer screenings.

We provided 694 HPV vaccines to Texan women and men.

500

\$100 makes 500 safer sex encounters possible through the distribution of condoms.

123,539 Healthcare visits in 2018 at Planned Parenthood health centers in Austin, Dallas, Denton, El Paso, Fort Worth, Paris, Tyler, Waco, and surrounding communities.

Of the patients served by PPGT in 2019
