

Upper Hudson Planned Parenthood

June 8th, 2018

Dear applicant:

We are the Upper Hudson Planned Parenthood Youth Health Promoters. We help to lower unplanned teen pregnancy and STD rates in our community as well as increase sexual and relationship health by distributing condoms, doing outreach in the local community and online through social media, presenting educational activities and programs, and providing resources and information to youth.

Youth health promoters undergo extensive training to learn about all areas of sexual health including anatomy, sex and sexuality, gender, HIV/AIDS and STDs, contraception (Birth Control), reproduction and reproductive health, healthy relationship skills, communication skills, and the services offered at Planned Parenthood.

It's our job to help spread sexual health awareness among the youth of our community. Being able to approach people freely and talk comfortably about sexual health is at the core of our job. We strive to be examples in our community and in our daily lives. We are looking for two young people in the Albany area to join our team.

If you are a high school aged person (14-21 years old) who values sexual health education, access to sexual health resources, and sexual health awareness- please apply by filling out the attached application (please be sure to fill out the full application as well as the 5 additional questions) and returning it to Upper Hudson Planned Parenthood at 855 Central Ave. Albany, NY, or by email to nicole@uhpp.org. Call (518)518-434-5678 for more information. If you have applied and are selected for an interview, you should hear from us within 2 weeks. Please also note that the position of Youth Health Promoter has a term limit of two years and the position cannot be held for longer than this two year duration.

Sincerely,

The UHPP Youth Health Promoter team

To help us get to know you better, please answer the following questions relating to the job, as well as the attached UHPP application.

Name: _____

1. How did you hear about the youth health promoter program?
2. What makes you interested in becoming a youth health promoter?
3. What experience do you have with public speaking? Would you feel comfortable talking about sexual health in front of a group?
4. What qualities would make you a good youth health promoter?
5. What do you see as the biggest issues that face youth in your community and how would you change it if you had the chance?
