

10 Ways We Are Keeping the PPLM Team Safe

SUMMER 2020 UPDATE:

Maintaining occupancy limits within our buildings and **requiring all persons to remain six feet apart** to the greatest extent possible

Requiring all staff to complete a **symptom and temperature check** each day they enter the office

Requiring face masks or coverings for all employees, patients, and visitors in accordance with the state's guidelines

Making **spatial adjustments to facilitate social distancing and proper hygiene** (e.g. single-use bathrooms, chairs six feet apart in all waiting rooms)

Continuing to see patients and **taking necessary precautions** during this time to ensure our patients receive the care they deserve:

- Providing **essential in-person care**
- Offering **telehealth appointments** and at-home services
- **Limiting escort access** unless the patient is a minor
- **Restricting walk-ins**

Implementing organization-wide **employee exposure guidelines**

Following state guidance on **out-of-state travel** and **self-quarantining**

Increasing the frequency of **cleaning and sanitation**

Enforcing organization-wide guidelines on **attending and hosting events**

Continuing to review and update organizational protocols based on **guidance from the Centers for Disease Control and Prevention (CDC), Massachusetts Department of Public Health (DPH), the state of Massachusetts, and city and local officials**

Looking for more information?

Patients - please call our call center at 800-258-448 or book a telehealth appointment online. Partner organizations - please reach out to your usual PPLM contact or email outreach@pplm.org.
