

This is Who We Are

Creating a Healthier World for Women, Men, and Young People

For more than a century, Planned Parenthood® has been one of the nation's leading providers of high-quality, affordable health care for women, men, and young people, and the nation's largest provider of sex education. Planned Parenthood health centers provide millions of people with contraception, testing and treatment for sexually transmitted infections (STIs), lifesaving cancer screenings, and safe, legal abortion. With a presence in all 50 states and Washington, D.C., Planned Parenthood has 55 affiliates, which operate more than 600 health centers. Globally, Planned Parenthood supports local partners in 12 focus countries, reaching over 2.2 million individuals with reproductive health information and services. Women, men, and young people from every community and income level view Planned Parenthood as their first-choice provider of care.

- An estimated one in five women in the U.S. has visited a Planned Parenthood health center.
- Planned Parenthood health centers provide health care that helps women prevent an estimated 400,000 unintended pregnancies in a single year.
- Planned Parenthood Global's partners reach 535,000 people through in-person educational activities and have reached more than 1.6 million people through the innovative and award-winning Global Mobile sites since its launch in 2016.
- Planned Parenthood websites, including Planned Parenthood en Español, receive an estimated 101 million visits in a single year.
- Of Planned Parenthood patients who report their income, nearly 75 percent live with incomes at or below 150 percent of the federal poverty level, the equivalent of \$37,650 a year for a family of four in 2018.
- Planned Parenthood affiliates provide the following services to 2.4 million patients, more than one-third of whom are people of color, including more than 560,000 patients who identify as Latino and nearly 390,000 patients who identify as Black:
 - family planning counseling and contraception to nearly 2 million patients
 - more than 1 million pregnancy tests
 - more than 270,000 Pap tests
 - nearly 300,000 lifesaving breast exams
 - screenings to more than 70,000 women whose cancer was detected early or whose abnormalities were identified and addressed
 - more than 4.7 million tests and treatments for sexually transmitted infections, including more than 740,000 HIV tests, and diagnoses of more than 240,000 STIs
 - more than 630,000 emergency contraception kits
 - education and outreach programs to 1.2 million people

Planned Parenthood Is

Health Care
