In this together.

This is our mantra at Planned Parenthood.

You, our incredible supporters and volunteers, power the work of our providers, community organizers, and educators. Together, we are focused on delivering high-quality, expert care and information to our communities. No matter what.

As you read this 2019 annual report, we hope you take pride in all you have helped PPGWNI accomplish despite escalating hostility and political attacks. It takes teamwork, tenacity, passion, and expertise to fulfill our mission of exceptional health care, honest education, and fearless advocacy for all. Thank you for being on our team!

In solidarity,

PPGWNI Board and Executive Team

Maria Razo, Vice President of Clinical Services
Julie Distel, Vice President of Strategic Initiatives
Lindsay Johnson, Vice President of External Affairs
Tiffany Harms, Vice President of Organizational Dev.
Paul Dillon, Vice President of Public Affairs
Investing in Employees

PPGWNI employees make this organization great. We are proud of the growth that has been possible because you have invested in their work this year.

We had 15 internal promotions in 2019. Your support ensures our staff’s hard work is recognized, including through internal growth and career development. Promoting from within allows us to continue critical work in local communities with a highly skilled team that is diverse, represents our communities, and is dedicated to our mission.

All PPGWNI employees now make at least $15 an hour. Supporters like you have strongly advocated for this change, which promotes equity and well-being in our communities, especially for women, people of color, LGBTQ community members, and individuals with children.

According to anonymous employee responses to a nationwide Planned Parenthood staff survey about job satisfaction and employee engagement, PPGWNI rated among the top three affiliates in the country in 2019!
More Care Under One Roof

Your generosity allows PPGWNI to respond and adapt to the needs of our communities, ensuring all patients receive the high-quality and compassionate care that everyone deserves.

Patients regularly tell us that we are their only source of health care. That’s why in 2019 we hired a primary care physician and introduced basic primary care services in Spokane, Spokane Valley, and Yakima with plans to expand to more health centers in 2020.

Our new basic primary care services include screening for and treatment of chronic diseases such as diabetes, hypertension, and high cholesterol. Early screening leads to better health outcomes, and patients no longer have to wait months for an appointment at another provider.

32,609 total patients
52,848 total patient visits
62,014 cancer screenings, HIV, and STI tests
116,996 birth control cycles given

“A visit with my primary care doctor was a month’s wait. Getting in at PP only took two days. So thankful they could see me because I had something that needed treatment right away.”

- PPGWNI patient
Behavioral Health Services

National research shows that 41% of patients rely on family planning clinics as their only source of health care services. Behavioral health problems such as depression, anxiety, and substance use disorders (SUDs) are among the most common health conditions worldwide.

In 2019, we added two licensed behavioral health providers who serve patients at our Spokane and Spokane Valley clinics. Our providers screen and treat or refer for anxiety, depression, domestic violence, and SUDs.

To address the opioid crisis and a rise in overdose-related deaths, PPGWNI also began carrying Narcan at each of our health centers. We are able to dispense this life-saving overdose treatment to patients who need it for themselves or a loved one.

“I am pleased to hear that PPGWNI has procured lifesaving Narcan for patients. Just one more way that Planned Parenthood is a major contributor to public health in our communities.”

- Steve Altmayer, Yakima donor
Increasing Abortion Access through Telemedicine

By harnessing technology, Planned Parenthood is minimizing barriers to abortion care, such as time and transportation. Accessibility is especially important to rural communities we serve, where distance from more populated and progressive cities can prevent people from obtaining timely, affordable care.

In 2019, PPGWNI expanded our abortion services via clinic-to-clinic telemedicine abortion (TeleMAB). Medical abortion (aka “the abortion pill”) is now available through TeleMAB at our Wenatchee, Kennewick, and Spokane Valley health centers. This service lifts the time and travel burden for many patients seeking abortion care in Central and Eastern Washington.

“I never once felt judged, and that was the most important thing to me.”

– Wenatchee telemedicine patient
Gender-Affirming Care

We are grateful for compassionate donors who have contributed to our Transgender Health Fund, which is available to PPGWNI's patients who are experiencing financial difficulty while receiving hormone therapy. Launched in June, the fund has received nearly $4,000 in community donations. This fund ensures continuity of care and consistency in health management.

1,166 gender-affirming care visits
Empowering Local Youth

PPGWNi’s Youth Empowerment Program (YEP) aims to change the face of local sex ed by delivering comprehensive, compassionate, and stigma-free sexual health presentations to youth all throughout Eastern and Central Washington.

In a charged political time, advocacy is more critical than ever, especially among young people. In 2019, YEP members received training in voter registration, Know Your Rights, community engagement, social media outreach, and so much more!

YEP invites high school youth to enroll continuously throughout the year, and they come from schools in Wenatchee, Yakima, and Spokane. YEP also partners with youth-serving organizations in Pullman, Okanogan, and Western Washington on statewide advocacy efforts.

174 presentations given

4,567 youth reached
Raíz Takes Root

You’ve helped us grow in so many ways, including the strengthening and expansion of Raíz (Spanish for “root”), a program that builds long-term, sustainable, community organizing structures with authentic partnership in the Latinx community. Through Raíz, PPGWNI is partnering with the Latinx community of Central and Eastern Washington to:

- Advocate for laws that protect civil rights and access to health care for ALL people
- Engage in voter registration drives
- Facilitate “Know Your Rights” workshops
- Outreach for Census 2020 “Get Out the Count”
- Travel to farmworker camps in the Wenatchee area to bring basic primary care and reproductive health services and supplies to farmworkers
As the Planned Parenthood community rose up in opposition to the Title X gag rule imposed by the Trump-Pence administration, Governor Jay Inslee ensured Washington State stepped in with interim Title X funding to guarantee these essential health services continue.

With Attorney General Ferguson’s motion in federal court, Washington State was a leader in challenging the Trump administration’s move to block Planned Parenthood from accessing Title X funding for reproductive health care and family planning.
PPGWNJ joined with organizations across the state to successfully advocate in Washington State’s legislature for the passage of the Reproductive Health Access for All Act (RHAA), guaranteeing access to reproductive health services for everyone. Governor Inslee signed the bill on May 13, 2019!

The fight continues. We need supporters like you to vote in every election, donate generously, and proudly advocate for patients who turn to Planned Parenthood. The health and lives of local people depend on it.
Powering the Future of this Fight

Your generous support of Planned Parenthood powers young advocates and leaders in the fight for reproductive justice now and for generations to come. PPGWNI has Generation Action groups on six campuses across our affiliate region:

- Central Washington University
- Eastern Washington University
- Whitworth University
- Washington State University
- Whitman College
- University of Idaho

Each Generation Action club leads their own campaign on campus to register voters, change sex education curriculum, and increase accessibility to reproductive health services.

PPGWNI was proud to lead the entire Planned Parenthood federation in voter registration in 2019! We want to give a special shout-out to Hannah, Generation Action Vice President of the Central Washington University Chapter, who was able to register over 100 voters in one day in Ellensburg.
