

HEALTHCARE YOU CAN TRUST

Meet Emily, one of the health experts who brings compassionate, high-quality care to Planned Parenthood patients every day.

Emily's background:

Emily is a Board-Certified Family Nurse Practitioner with a Master's of Science in Nursing. She began working in healthcare when she was 19 years old.

In her words:

I love working in women's health and family planning. I think it's important to emphasize that sexual and reproductive health are just as important as any other healthcare service. I'm happy Planned Parenthood is bringing much needed services to the El Paso community.

Planned Parenthood's clinicians average more than 21 years of healthcare experience, and include Physicians, Women's Health Care Nurse Practitioners, Family Nurse Practitioners, Certified Nurse Midwives, Physician Assistants, and other advanced levels of certification and licensure.

This year, we're proud of the thousands of people we've impacted with life-saving healthcare and sex education, and by advocating for our patients, no matter what. With your support, we're focused on expanding access to healthcare services including IUD and implants, cervical cancer prevention, treatment for sexually transmitted infections, PrEP and PEP to prevent HIV transmission, and more.

Perhaps most importantly, we've opened health centers where

healthcare is needed. Our new El Paso health center is now open for patients regardless of insurance or documentation status, income level, or who they love. We're proud to join this vibrant community and are honored by the warm welcome we received.

We stand strong because of you.

Thank you.

Planned Parenthood Launches Birth Control Telemedicines

Beginning in late October, Texans can access birth control prescriptions and home delivery service using the Planned Parenthood telemedicine app, **Planned Parenthood Direct**.

The service will be available statewide, allowing residents in areas isolated from healthcare providers to access birth control from their phone. Planned Parenthood hopes to expand use of the app for other healthcare services in the future.

The Planned Parenthood Direct app is available for free in your iTunes or Android app store.

El Paso Welcomes New Planned Parenthood Health Center

Last spring, Planned Parenthood of Greater Texas announced that lead donations would allow us to expand services into West Texas.

In early October, Planned Parenthood leaders stood with State Senator José Rodríguez, State Representative Lina Ortega, and reproductive healthcare providers and advocates to announce the health center opening soon in El Paso.

We are proud to join this vibrant and growing community and to provide the healthcare El Pasoans need.

Appointments are available at:
**ppgreatertx.org and
1-800-230-PLAN**

Planned Parenthood Invests in Fort Worth

For more than 30 years, Fort Worth has relied on healthcare at our Southeast Health Center on Miller Avenue.

In September, donors, staff, and supporters gathered to celebrate renovations at the Southeast location. This is part of a multi-year plan to update or renovate all of our health centers to better serve patients for generations to come. All four of our Tarrant County locations (Arlington, Bedford, Southeast Fort Worth, and Southwest Fort Worth) are now updated.

Planned Parenthood has also expanded other services in Tarrant county, including increased teen pregnancy prevention outreach; PrEP and PEP HIV prevention services; and gender affirming hormone therapy in Arlington.

YOUR PARTNER FOR A HEALTHY COMMUNITY

Connecting in our communities for a healthier Texas

In August we hosted a Paint and Sip Period Kit Drive in Dallas to make more than 350 menstrual kits for people in need.

PPGT volunteers and advocates joined with tens of thousands in downtown Austin for the 2018 Pride Parade in August.

Waco-area volunteers handed out safer sex materials and information at the Welcome Back to College Condom Crawl in August.

Fort Worth volunteers and supporters gathered in September to write letters and postcards to elected officials supporting healthcare.
