

# Our Impact in Texas.

In Texas, your support helped us expand care and pioneer new services, including **telehealth visits**, **curbside Depo birth control shots and prescription pill pickup**, and **advanced gynecological clinics** in additional Houston health centers. We also launched the **Chat/Text program**, which enables people of all ages to contact PPGC health educators through text or instant messaging to ask questions about birth control, emergency contraception, STD testing, pregnancy testing, and abortion. Also last year, three PPGC educators and three young people from our Houston teenREACH program **testified to the Texas State Board of Education** about the importance of updating the Health Education TEKS (Texas Essential Knowledge and Skills). Finally, we trained **41 volunteer deputy voter registrars** who then conducted **251 hours of voter registration** at community events and in all six Houston-area health centers.

"I felt very safe. I was scared to go anywhere with the COVID-19 pandemic, but they went above and beyond my expectations for safety."

**SPRING HEALTH CENTER PATIENT**

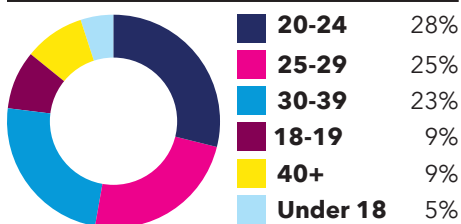

"I would like to thank Planned Parenthood for the absolutely vital and imperative role that they play in the overall health of our community."

**PREVENTION PARK HOUSTON HEALTH CENTER PATIENT**

"Everything was perfect. I will recommend Planned Parenthood Gulf Coast for the rest of my life. The whole experience was just so relieving."

**PREVENTION PARK HOUSTON HEALTH CENTER PATIENT**
