

This document is an example of a visit summary that has all of the information PPIL would need if a patient is referred to us. We can avoid duplicative testing if the testing that is done at your site is documented. This document is not meant to be directive or all-inclusive.

PATIENT:
GENDER IDENTITY: Female
DATE OF BIRTH / AGE: [REDACTED]
MEDICAL RECORD: 0000000
DATE: (01/27/2022 12:50 PM CST) 02/11/2022 9:19 AM EST
LOCATION: [REDACTED]

Test patient with sample data.
No real patient information reported.

Problem List

No active problems

Allergies

No known allergies.

Ingredient	Reaction (Severity)	Medication Name	Comment
NO KNOWN ALLERGIES			

Reproductive History

Estimated gestational age: 9 weeks 3 days based on LMP
Estimated gestational age: 9 weeks 5 days based on ultrasound

Menstrual History

LMP: 11/22/2021. LMP date reported as definite.

Pregnancy History

Pregnancy history confirmed with patient.
Gravida: 1 P: 0 SAB: 0 TAB: 0 Ectopic: 0 Living children: 0 C - sections: 0
Not breastfeeding

Contraceptive History

Current birth control method: Unplanned Pregnancy
Desired birth control method: None - Other Reason
Previous birth control methods:

Previous BCM	Comments
Ring	
Oral (COC)	
IUS (Levonorgestrel)	

General Abortion History

Is NEGATIVE for:
Asthma; Currently ill; Endometrial ablation; Fibroids; Hemorrhage after delivery or abortion; Hemorrhagic disorder; HIV/AIDS; Infection in uterus/tubes/ovaries; IUC in place; Recent STI and/or PID; Uterine surgery

Surgical Abortion History

Is **NEGATIVE** for:

Asthma; Hemorrhage after delivery or abortion; Currently ill; Endometrial ablation; Fibroids; HIV/AIDS; Infection in uterus/tubes/ovaries; Recent STI and/or PID; Uterine surgery

Medical History

Is **POSITIVE** for

Chlamydia; Trichomoniasis

Is **NEGATIVE** for:

Asthma; Fibroids; HIV/AIDS

Past Medical/Surgical History Grid

Condition	Onset Date	Procedure	Date	Outcome	Comments
Chlamydia					
Trichomoniasis					

Past Labs

Date of last PAP: 05/08/2019.

Symptoms and Findings

Pregnancy Symptoms

Spotting or bleeding since her last LMP that began on 01/05/2022, frequency is constant, lasting 3 days and she describes the quality as spotting

No lower abdominal/pelvic pain since LMP

OBJECTIVE

Vital Signs

Date	Time	Ht In	Wt Lb	Temp F	Pulse	Pulse Ox Rest	Pulse Ox Amb	Resp	Peak Flow	BMI	Measured By
